

HOW TO CHOOSE THE RIGHT PRODUCT

Example:

Application data:

Total load of application: 30 kg Max. working stroke: 0,5 m

Research: www.easy-balancer.com

Load range ?

Cable travel ?

TYPE EB35

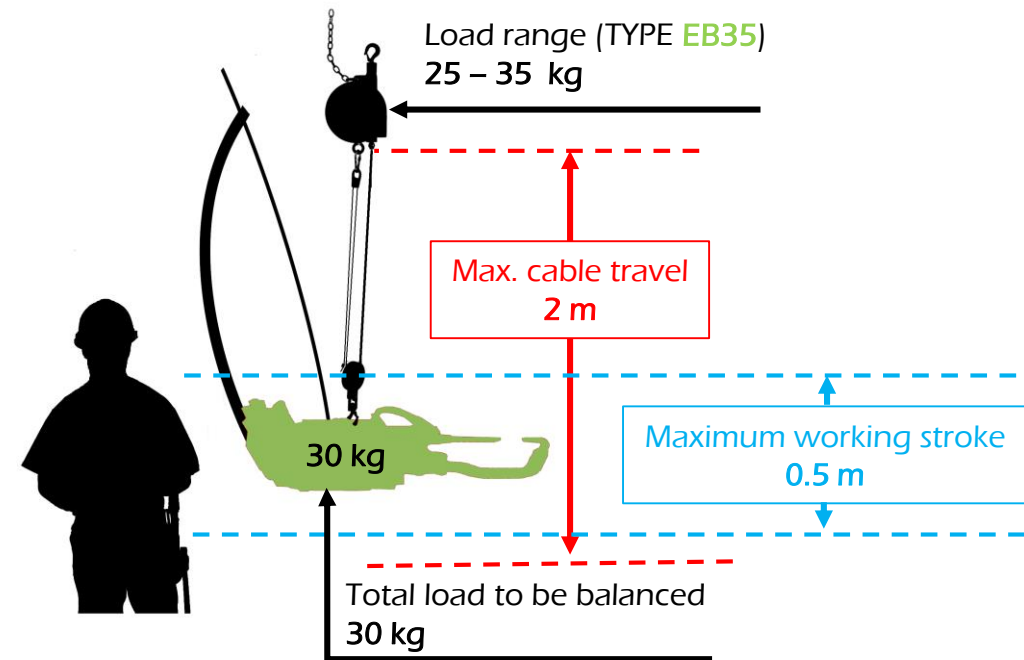

Load range 25-35 kg = OK

Cable travel 2 m = OK

Make sure, that the load to be balanced is within the load range of the product, while the working stroke should be less than the maximum cable travel.
